

PCN Policy Statement

[GCT Semiconductor](#)'s Product/Process Change Notice (PCN) policy targets compliance with JESD46C. We notify our customers of major changes that may affect device form, fit, function, quality, or reliability. GCT Semiconductor reserves the right to make changes on products without notice when such changes are considered minor and do not interfere with the general purpose (form, fit, function, quality, or reliability) for which such items are manufactured. If a change affects published specifications, the specifications will be updated the next time the datasheet is published. PCN's are published 90 days prior to shipping changed material although extenuating circumstances sometimes result in less than 90 day notification. Any requests for samples of changed material or additional information must be made within 30 days of the notification as posted on GCT Semiconductor's website Quality page.

PCN's will contain, at a minimum, the following information:

- PCN number
- Publication date
- Effectivity date, which is the earliest possible date a customer could expect to receive changed material.
- Description of change
- Reason/Purpose for change
- Anticipated impact of the change (positive or negative) on fit, form, function, quality, or reliability
- GCT Semiconductor part numbers affected by the change
- Supporting information
- Contact information

PDN Policy Statement

GCT Semiconductor's Product Discontinuance Notice (PDN) policy is generally to provide a 12 month Last Time Buy (LTB) period and 12 month Last Time Ship (LTS) period from date of notification. However, extenuating circumstances sometimes will reduce these time windows. PDN's will contain, at a minimum, the following information:

- PDN number
- Publication date
- Last Time Order date
- Last Time Ship date
- Reason for Discontinuance
- GCT Semiconductor devices affected by the notice
- Replacement product device name
- Contact information
